DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species I; As disclosed in Figures 1-7
- Species II; As disclosed in Figures 9-12
- Species III; As disclosed in Figures 13-14
- Species IV; As disclosed in Figures 15A, 15B, 15C
- Species V; As disclosed in Figures 16A, 16B, 16C
 - **Alternative Joint Arrangement Feature**
 - Sub Feature I; As disclosed in Figure 16D
 - Sub Feature II; As disclosed in Figure 16E
 - Sub Feature III; As disclosed in Figure 17B
 - **Attachment Means Feature**
 - Sub Feature I; As disclosed in Figure 16F
 - Sub Feature II; As disclosed in Figure 17A
- Species VI; As disclosed in Figures 18A, 18B, 18C

Applicant is required, in reply to this action, to elect a single Species, and associated Sub Feature, (if applicable) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species,

Art Unit: 3635

including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-10 correspond to Species I, Claims 11-28 correspond to Species IV, and Claims 29-37 correspond to Species II.

The following claim(s) are generic: No Claims are generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species I and Species IV lack corresponding technical features in that the method of installation differs since Species I is an integrally folded member and Species IV is attached via separate fastening members. Species I and IV differ from Species II because, Species II corresponds to a door lintel block which shares no special technical features, or can be used interchangeable with Species I or IV.
